

Introduction To the Problem:

Car accidents is a big problem in the world that causes death, injury, car damage. Governments tries to reduce car accidents by different ways.

Some of the causes of car accidents are:

- Roads are not good
- The drivers are not focused on the road

and many other causes

So In this project i will use Car accidents database in canada and python libraries to discuss:

- 1- factors that causes car accidents
- 2- losses caused by car accidents
- 3- factors that reduce car accidents

and predict:

- 1- if the road safe or dangerous
- 2- roads that are safe
- 3- how to reduce car accidents
